Item # 08-01054

**Sunstream Dock Jock
(1000 pound capacity)**

The Dock Jock is a dock mounted track lift for small crafts, such as PWC's and dinghies. The controls are conveniently located on the winch. Unlike, other systems, the Dock Jock uses a nylon lifting strap to avoid the problems with cables. The bunk length is 5 foot, the lifting range is 4 foot, and the power source is 110 volt AC. This lift is great for mounting to a seawall, stationary pier, or a swim dock.
