

THE SCOTT  
DOCK MOUNT  
*No-Icer*

- Mounts quickly and easily to any dock, hardware included!
- Adjusts for varying water levels and current changes in seconds.
- Rugged stainless-steel design.
- 25 foot power cord.

THE SCOTT  
FLOATING MODEL  
*No-Icer*

- Suspends from a float approximately 2 feet below the waters surface for superior ice prevention and removal.
- The simple mooring design allows for quick and easy re-location to problem areas.
- The floating action of this No-Icer allows for fluctuating water levels.
- 35 foot power cord.

*A Scott No-Icer keeps ice from forming by bringing warmer water from the bottom and sending it out in a continuous agitated movement.*

THE SCOTT  
SLINGER STYLE  
*No-Icer*

- Flexible mounting options; conveniently suspends from a boat or dock with the nylon rope provided.
- Unique design allows for use in hard-to-reach areas and for rapidly changing conditions.
- Economical solution to prevent ice formation in large marinas and dock areas.
- 25 foot power cord.

**General Information  
For All Scott No-Icers:**

- Oil Free Motors
- Fresh or Salt Water Approved
- 12 Gauge Submersible Power Cord, Greater Lengths Available
- Made in USA

**Ice build-up** during the winter can cause numerous problems around boats, dock pilings, and boat houses as well as fish and wildlife ponds. The Scott Aerator Company, with over 40 years of experience, has developed a superior No-Icer that is efficient, reliable and extremely durable in keeping surface areas free of damaging ice.

THE SCOTT  
**NO-ICER**

- **Efficient**
- **Reliable**
- **Durable**
