A Great Idea for Winter Weather Damage Prevention November 2014

*Tiger Docks™ now has distribution rights for the unique **Dock-Watch Dual Probe Thermostat***

- Provides both peace of mind and cost savings to dock and boat owners
- Designed to offer the highest possible energy savings
- Two thermostats in one:
 - the upper thermostat measures the air temperature
 - the lower thermostat measures the temperature below the water line
- Automatically turns on what is plugged into it (de-icer, warmer, etc.) when both air and water temperature reach freezing
- Helps to save dock and boat from damage that can occur when water turns to ice
- Saves the dock and boat owner thousands of dollars in potential repairs

The Dock-Watch Dual Probe Thermostat is a Missouri-made product that comes with a 1-year warranty.
