## **Boat Lift Canopies**

### **Attractive Protection from the Elements**

**HoverCover™**

**Deluxe Canopy**

**EcoCanopy™**

The **HoverCover™** is one of the only covers that mount on a floating lift. Protect your boat at the dock or on a buoy. The HoverCover is an excellent choice when a low-profile canopy is desired. The first of its kind, the HoverCover moves simultaneously with the lift. The cover rises as you lower your boat for easy and safe boarding of passengers. As you raise your boat, the HoverCover lowers, providing snug protection from weather, sun, birds and grime. (Patent pending.)

The **Deluxe Canopy** provides year-round protection and an attractive appearance. Whether you choose the heavy-grade Weblon™ vinyl or the optional Sunbrella™ fabric, the easy-to-install cover will quickly enhance the polished look and functionality of your dock while protecting your boat.

The **EcoCanopy™** is the perfect choice if you moor in an environmentally-regulated area. Exclusive to Sunstream, the translucent fabric of the EcoCanopy protects your boat and the environment. The EcoCanopy is the preferred canopy of the Army Corp of Engineers. (Patent pending.)
