

## **Underwater Air Lift Bags Descriptions**

### **OPEN BOTTOM LIFT BAGS**

Open Bottom Lift Bags illustrated above: the CB-50 to CB-250 lb series bag, the CB-300 to CB-2000 lb series bag, and the CB-12000 lb bag

☆ Great for sport divers and light salvage

**Open Bottom Lift Bags** are very versatile light-to-medium-duty lift bags. They are excellent for sport divers, and are suitable for most types of underwater lifting and light salvage. All but the 25 lb, 50 lb and 75 lb bags have diver-actuated dump valves, and all are open at the bottom to vent expanding air as they ascend. They are economical, lightweight, and fold into a neat, compact roll for easy handling underwater. The 25 lb and 75 lb bags are made from a strong but lighter weight urethane coated nylon material that can be rolled up very small.

\*\* Please see the table in the Underwater Air Lift Bags store for specific sizes and pricing on all our lift bags.
