

Underwater Air Lift Bags Descriptions

SPEAR FISHING FLOATS

- Designed to bring speared fish to the surface)

The **Spear Fishing Floats** are smaller versions of the personal floats that are designed to be used by spear fishermen to bring speared fish to the surface. They lift 25 lbs and can also be used as small lift bags or as buoys to mark dive locations. They have a one way mouth inflation valve and an over-pressure valve. They can be ordered with an optional 38-gram CO2 inflation cylinder. The CBFF-25/CO2 is shown in photo at left.

** Please see the table in the Underwater Air Lift Bags store for specific sizes and pricing on all our lift bags.
