

Tiger Docks
Waterfront Specialists

***Custom-designed and manufactured
premium water features including
Sliders, Kickers and Ski Jumps***

- Demand for our expertise at nationally-known events has resulted in our offering this exciting new line of water obstacles.
- Water features professionally designed and manufactured by a team with 20 years' experience in building floating structures for all types of marine environments.
- Features are built with marine-grade 6065 aluminum and HDPE plastic sliding surfaces.
- Stainless steel hardware and encapsulated floatation assure years of rugged use.
- Custom designs guarantee features are as original as the people who use them.
- Tiger Docks' CAD designer will draw floating features for you to see in 3-D before they are built.
- Your park will be unlike any other because your custom-built water features are unique.

***The core of any feature is how it floats and reacts when forces are applied to it;
we have the experience to get this right.***
