

Flag Poles & Flags

Telescoping Flag Poles

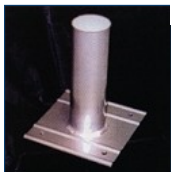

add beauty and national pride to your water-

Display your flags with ultimate ease.

- Our flag poles come in 3 height options: 16, 20 or 25 ft
- Unique telescoping design allows sections to raise and lower with the push of a button
- Polycarbonate bushings let the pole slide up and down smoothly and quietly
- All models give you the option to fly 1 or 2 flags
- Flags fasten onto a swivel harness (25 ft pole) or swivel rings (16 and 20 ft poles) —
No ropes. No chains. No pulleys. No knots or tangles!
- Flags move 360° so they fly with the breeze rather than wrapping around the pole
- Flat dock mount or side mount available
- Beautiful silver color, made of 16 gauge aluminum with anodized finish
- Maintenance-free; no rust or painting!

Each order includes a 3-inch ball ornament, a double flag harness, a 3'x5' nylon American flag with embroidered stars and sewn stripes (25' pole comes with 4'x6' flag), and an installation sleeve with complete instructions. Additional flags also available.
